

Content-related requirements for admission at BOKU

Please be aware that at BOKU definite **content-related requirements for admission** exist.

Graduates of Bachelor degrees completed at a recognised domestic or foreign higher education institution who want to apply for the master "AgroEco-Organic" or the double degree master "EUR-Organic" have to demonstrate knowledge in natural and social sciences as well as engineering to be admitted at the University of Natural Resources and Life Sciences, Vienna (BOKU).

For admission to the master programme you have to demonstrate basic knowledge of at least 20 ECTS credits in each of the following areas:

Area I: Natural sciences

Area II: Agricultural production techniques

Area III: Social sciences, economics and law

Please note:

If you fail to fulfil these requirements, you will be admitted at BOKU with the **respective conditions up to 30 ECTS in addition to your regular study programme.**

In case the conditions surpass 30 ECTS, you may not be admitted.

Do a **self-evaluation** to find out if you are eligible for admission based on the courses you passed during your bachelor/master studies!

Please note:

This self-evaluation is for your orientation only. No legal claims can be derived therefrom.

After you recognised that you are eligible, you can officially apply for admission. However, the final decision about your admission will be taken by the programme coordinator.
